

Linked List : delete node at last position

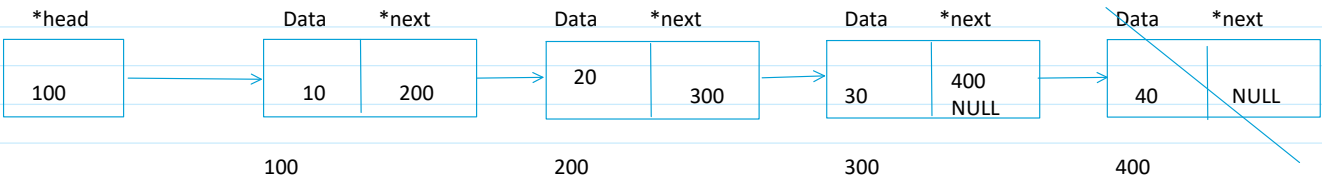

25 April 2023 15:53

If list contains only 1 node

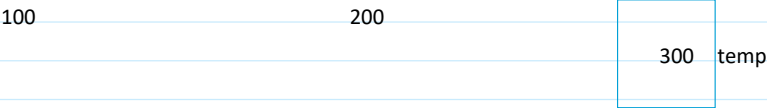

Check if head-> next is NULL
If yes, free head
Head = NULL

If List contains multiple nodes

Traverse till the second last node

While(temp->next->next != NULL)
Temp = temp->next;

Free(400)
Free(temp->next)
Temp->next = NULL
