

Singly linear Linked List : Add node at first position

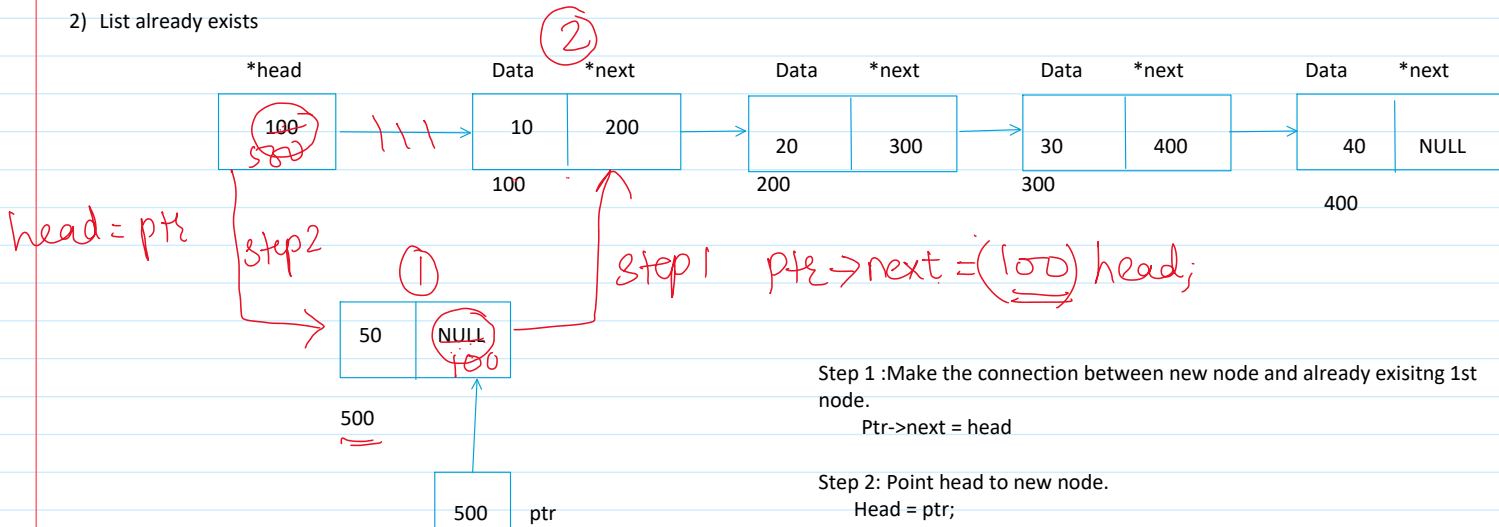

24 April 2023 15:51

1) List is Empty : Head is NULL

If(head == NULL)
Head = ptr;

2) List already exists

Step 1 : Make the connection between new node and already existing 1st node.

`Ptr->next = head`

Step 2: Point head to new node.

`Head = ptr;`
