Linked List : Add node at specific position
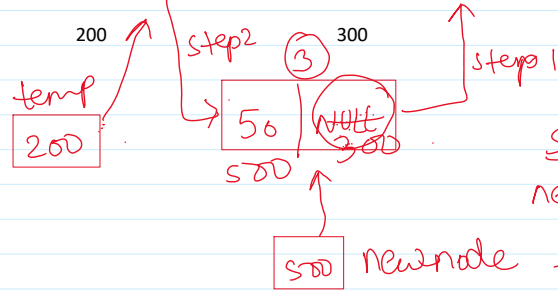

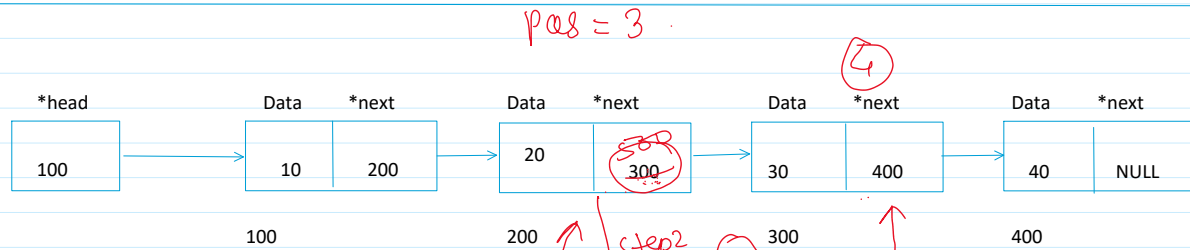

1) If head is NULL or position specified by user is 1 or less than 1
2) Add node at first position. -> call add_first() function

pos = 3

④

*head		Data	*next		Data	*next		Data	*next		Data	*next
100		10	200		20	300		30	400		40	NULL

100   200   300   400

temp

200   step2   ③

56   NULL 300

500

500 → next = 300

newnode → next = temp → next

step1

500 newnode   temp → next = newnode;

1) traverse a temp pointer
    till pos -1
